## **Energy Forum & Expo CO 2012**

You are invited to participate in the Seventh Annual Energy Forum & Expo CO to be held in Grand Junction, Colorado on Friday, February 24, 2012.

Western Colorado is a hub for innovation, technological advancement and exciting opportunity in energy production. Our region is of strategic importance in ensuring America increases energy independence and maintains economic vitality now and in the future. Western Colorado is also a vital region in the national transition towards alternative energy.

Energy resources are abundant in the region including super-compliant coal, natural gas, oil shale, uranium and a host of possibilities for alternative fuels including solar, bio-mass, geothermal and the harnessing of wind power. Western Colorado is an epicenter for the brightest minds, the latest technologies and the most visionary companies in the energy development sector.

The purpose of the Energy Forum & Expo CO is to provide an informational forum displaying the latest technologies and providing the most recent news on energy development. This event will showcase and examine Western Colorado's role in moving towards renewable and alternative forms of energy as well as showcasing the latest innovations in the development of hydrocarbons.

Vendor exhibits and informational booths are displayed throughout the event for the public and forum attendees. You and your company are invited to be a participant in this all day event. Sponsorship enables participants and area students to learn about your company's role in the energy industry. In addition, sponsorship will increase a more general public awareness regarding established development techniques, new and evolving technologies and ground-breaking research currently applied in the energy field. Participants will be available to answer questions and marketing opportunities will be plentiful as you interact with other companies and consultants. The public will leave the forum & expo with an increased awareness of just what opportunities face Western Colorado as the epicenter and a key contributor in meeting our nation's energy demands.

Event sponsorship will also benefit your company by:

- Recognition in printed materials distributed at the seminar
- A link from the Energy Forum & Expo CO web page to your company website
- The opportunity to distribute your promotional materials to the forum / seminar attendees
- A sign with your company's name and logo displayed at your sponsored event/booth

**Sponsorships and vendor booth space is limited. Due to the space restrictions at Two Rivers Convention Center, your completed application is not a guarantee in the Energy Forum & Expo CO until your company is invoiced.**

**Thank you for your interest and participation.....**
